Send your reservation request to ASU via email at reservations@ASU-columbus.org.** Please place your reservation by 3 pm, of the Friday before the meeting. Cancellations will be accepted until 12:00 noon of the Monday before the meeting. Reservations made, but not attended, will result in monies owed.

MetaViewer Indexes iSeries Spool File Output

This month Kimberly Hall from Metafile shares how their MetaViewer solution captures and organizes full-text indexes and delivers the information you need to manage your business. MetaViewer eliminates microfilm and dramatically reduces your paper and printing costs. This solution can manage output from the iSeries, mainframe, UNIX, PDF, Windows, HTML and more. In addition, you can manage output from and integrate the MetaViewer solution with all major ERP, CRM and Accounting applications regardless of the platform..

The MetaViewer Client delivers all the power of MetaViewer Enterprise in an easy to use client suitable for use by computer users at any level. MetaViewer is designed specifically for full-text data mining and cross-referencing millions of pages of print output and scanned images.

The unique security capabilities allow you to burst documents into specific subsets as small as just one page. Users can retrieve those reports or report pages they are authorized to see using the Windows thick or thin client viewer or standard Web browsers. Portions of the information can then be quickly emailed or exported to a spreadsheet or other application for further analysis or formatting. Query results may also be printed, faxed or e-mailed directly from the system.

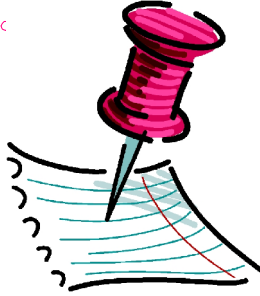

Metafile is an employee-owned software developer headquartered in Rochester, MN with no debt and profitable for nine years running. Its unique Full-Text Indexing and Search capability is the heart of the system. The company is pleased to have strong strategic and technical alliances with corporations such as IBM/WebSphere, Doculabs, Infinium Usernet and AIIM.

Ms. Hall is responsible for a five state area in the Great Lakes region along with Ontario Canada. Ms. Hall has helped customers ranging in size from a single-station implementation all the way up to global corporations with several hundred users worldwide with several hundred defined reports going into the Metafile ECM system.

President's Note...

Hello All .

The Holiday Season is now upon us. Let's take a few moments and reflect on all those challenges that we have overcome and will overcome shortly. For ASU, we need to be thinking how we can become stronger as a user group within Central Ohio. I welcome all that have ideas. In fact, be very creative with your ideas that could help build our membership. I would like for each of us to be once again committed within our Association as we enter the Holiday Season.

I invite the entire membership to join me in welcoming Kimberley Hall of Metafile. Kimberley will describe and discuss some very important facts and challenges concerning document management in our businesses today. Please see additional information within the newsletter about the November presentation.

Finally, I would like to thank Terry Rogers for giving an outstanding presentation on the Customer and the Missing Enterprise piece.

As always, bring a friend or two to the ASU meeting.

John
